

quota

Display users' disk space usage and allocated limits.

- Show disk quotas in human readable units for the current user:

```
quota -s
```

- Verbose output (also display quotas on filesystems where no storage is allocated):

```
quota -v
```

- Quiet output (only display quotas on filesystems where usage is over quota):

```
quota -q
```

- Print quotas for the groups of which the current user is a member:

```
quota -g
```

- Show disk quotas for another user:

```
sudo quota -u {{username}}
```
