

gource

Renders an animated tree diagram of Git, SVN, Mercurial and Bazaar repositories. It shows files and folders being created, modified or removed over time.

- Run gource in a directory (if it isn't the repository's root directory, the root is sought up from there):

```
gource {{path/to/repository}}
```

- Run gource in the current directory, with a custom output resolution:

```
gource -{{width}}x{{height}}
```

- Set a custom time scale for the animation:

```
gource -c {{time_scale_multiplier}}
```

- Set how long each day should be in the animation (this combines with -c, if provided):

```
gource -s {{seconds}}
```

- Set fullscreen mode and a custom background color:

```
gource -f -b {{hex_color_code}}
```

- Set a title for the animation:

```
gource --title {{title}}
```
