

# cppclean

Find unused code in C++ projects.

- Run in a project's folder:

```
cppclean {{path/to/project}}
```

- Run on a project where the headers are in the "inc1/" and "inc2/" folders:

```
cppclean {{path/to/project}} --include-path={{inc1}} --include-path={{inc2}}
```

- Run on a specific file "main.cpp":

```
cppclean {{main.cpp}}
```

- Run on the current directory, excluding the "build" directory:

```
cppclean {{.}} --exclude={{build}}
```
