

pdftopdf

Search text in PDF files.

- Find lines that match pattern in a PDF:

```
pdftopdf {{pattern}} {{file.pdf}}
```

- Include file name and page number for each matched line:

```
pdftopdf --with-filename --page-number {{pattern}} {{file.pdf}}
```

- Do a case insensitive search for lines that begin with "foo" and return the first 3 matches:

```
pdftopdf --max-count {{3}} --ignore-case {{'^foo'}} {{file.pdf}}
```

- Find pattern in files with a .pdf extension in the current directory recursively:

```
pdftopdf --recursive {{pattern}}
```

- Find pattern on files that match a specific glob in the current directory recursively:

```
pdftopdf --recursive --include {{'*book.pdf'}} {{pattern}}
```
