

vim

Vi IMproved, a programmer's text editor, providing several modes for different kinds of text manipulation.
Pressing i enters edit mode. <Esc> goes back to normal mode, which doesn't allow regular text insertion.

- Open a file:

```
vim {{file}}
```

- Enter text editing mode (insert mode):

```
<Esc>i
```

- Copy ("yank") or cut ("delete") the current line (paste it with P):

```
<Esc>{{yy|dd}}
```

- Undo the last operation:

```
<Esc>u
```

- Search for a pattern in the file (press n/N to go to next/previous match):

```
<Esc>/{{search_pattern}}<Enter>
```

- Perform a regex substitution in the whole file:

```
<Esc>:%s/{{pattern}}/{{replacement}}/g<Enter>
```

- Save (write) the file, and quit:

```
<Esc>:wq<Enter>
```

- Quit without saving:

```
<Esc>:q!<Enter>
```
