

stat

Display file and filesystem information.

- Show file properties such as size, permissions, creation and access dates among others:

```
stat {{file}}
```

- Same as above but in a more concise way:

```
stat -t {{file}}
```

- Show filesystem information:

```
stat -f {{file}}
```

- Show only octal file permissions:

```
stat -c "%a %n" {{file}}
```

- Show owner and group of the file:

```
stat -c "%U %G" {{file}}
```

- Show the size of the file in bytes:

```
stat -c "%s %n" {{file}}
```
