

chage

Change user account and password expiry information.

- List password information for the user:

```
chage -l {{user_name}}
```

- Enable password expiration in 10 days:

```
sudo chage -M {{10}} {{user_name}}
```

- Disable password expiration:

```
sudo chage -M -1 {{user_name}}
```

- Set account expiration date:

```
sudo chage -E {{YYYY-MM-DD}}
```

- Force user to change password on next log in:

```
sudo chage -d 0
```
