

paci

A lightweight and flexible package manager for bash scripts.

- Update the list of available packages and versions (it's recommended to run this before other paci commands):

`paci refresh`

- Configure its behaviour:

`paci configure`

- Search for a given package:

`paci search {{package}}`

- Install a package:

`paci install {{package}}`

- Update a package:

`paci update {{package}}`
