

# pkgmk

Make a binary package for use with pkgadd on CRUX.

- Make and download a package:

```
pkgmk -d
```

- Install the package after making it:

```
pkgmk -d -i
```

- Upgrade the package after making it:

```
pkgmk -d -u
```

- Ignore the footprint when making a package:

```
pkgmk -d -if
```

- Ignore the MD5 sum when making a package:

```
pkgmk -d -im
```

- Update the package's footprint:

```
pkgmk -uf
```
