

whatis

Display one-line descriptions from manual pages.

- Display a description from a man page:

```
whatis {{command}}
```

- Don't cut the description off at the end of the line:

```
whatis --long {{command}}
```

- Display descriptions for all commands matching a glob:

```
whatis --wildcard {{net*}}
```

- Search man page descriptions with a regular expression:

```
whatis --regex '{{wish[0-9]\.[0-9]}}
```
