

sudo

Executes a single command as another user.

- List the contents of an unreadable directory:

```
sudo {{ls}} {{/usr/local/src}}
```

- Edit a file as the user www:

```
sudo -u {{www}} {{vi}} {{/var/www/index.html}}
```

- Shut down the machine:

```
sudo {{shutdown}} -h +10 {{"Cya soon!"}}
```

- Repeat the last command as sudo:

```
sudo !!
```

- Launch the default shell with root privileges:

```
sudo -i
```
