

ssh-add

Manage loaded ssh keys in the ssh-agent.
Ensure that ssh-agent is up and running for the keys to be loaded in it.

- Add the default ssh keys in "~/.ssh" to the ssh-agent:

ssh-add

- Add a specific key to the ssh-agent:

ssh-add {{path/to/private_key}}

- List fingerprints of currently loaded keys:

ssh-add -l

- Delete a key from the ssh-agent:

ssh-add -d {{path/to/private_key}}

- Delete all currently loaded keys from the ssh-agent:

ssh-add -D
