

# ufw

Uncomplicated Firewall.  
Frontend for iptables aiming to make configuration of a firewall easier.

- Enable ufw:

```
ufw enable
```

- Disable ufw:

```
ufw disable
```

- Show ufw rules, along with their numbers:

```
ufw status numbered
```

- Allow incoming traffic on port 5432 on this host with a comment identifying the service:

```
ufw allow {{5432}} comment {"Service"}
```

- Allow only TCP traffic from 192.168.0.4 to any address on this host, on port 22:

```
ufw allow proto {{tcp}} from {{192.168.0.4}} to {{any}} port {{22}}
```

- Deny traffic on port 80 on this host:

```
ufw deny {{80}}
```

- Deny all UDP traffic to port 22:

```
ufw deny proto {{udp}} from {{any}} to {{any}} port {{22}}
```

- Delete a particular rule. The rule number can be retrieved from the `ufw status numbered` command:

```
ufw delete {{rule_number}}
```
