

expand

Convert tabs to spaces.

- Convert tabs in each file to spaces, writing to standard output:

```
expand {{file}}
```

- Convert tabs to spaces, reading from standard input:

```
expand
```

- Do not convert tabs after non blanks:

```
expand -i {{file}}
```

- Have tabs a certain number of characters apart, not 8:

```
expand -t={{number}} {{file}}
```

- Use comma separated list of explicit tab positions:

```
expand -t={{list}}
```
