

dirs

Displays or manipulates the directory stack.

The directory stack is a list of recently visited directories that can be manipulated with the `pushd` and `popd` commands.

- Display the directory stack with a space between each entry:

```
dirs
```

- Display the directory stack with one entry per line:

```
dirs -p
```

- Display only the *n*th entry in the directory stack, starting at 0:

```
dirs +{{N}}
```

- Clear the directory stack:

```
dirs -c
```
