

XZ

Compress or decompress .xz and .lzma files.

- Compress a file:

```
xz {{file}}
```

- Decompress a file:

```
xz -d {{file.xz}}
```

- Decompress a file and write to stdout:

```
xz -dc {{file.xz}}
```

- Compress a file, but don't delete the original:

```
xz -k {{file}}
```

- Compress a file using the fastest compression:

```
xz -0 {{file}}
```

- Compress a file using the best compression:

```
xz -9 {{file}}
```
