

journalctl

Query the systemd journal.

- Show all messages from this boot:

```
journalctl -b
```

- Show all messages from last boot:

```
journalctl -b -1
```

- Follow new messages (like `tail -f` for traditional syslog):

```
journalctl -f
```

- Show all messages by a specific unit:

```
journalctl -u {{unit}}
```

- Show all messages by a specific process:

```
journalctl _PID={{pid}}
```

- Show all messages by a specific executable:

```
journalctl {{/path/to/executable}}
```
