

# git mv

Move or rename files and update the git index.

- Move file inside the repo and add the movement to the next commit:

```
git mv {{path/to/file}} {{new/path/to/file}}
```

- Rename file and add renaming to the next commit:

```
git mv {{filename}} {{new_filename}}
```

- Overwrite the file in the target path if it exists:

```
git mv --force {{file}} {{target}}
```
