

ruby

Ruby programming language interpreter.

- Open an Interactive Ruby Shell (REPL):

```
irb
```

- Execute a Ruby script:

```
ruby {{script.rb}}
```

- Execute a single Ruby command in the command line:

```
ruby -e {{command}}
```

- Check for syntax errors on a given Ruby script:

```
ruby -c {{script.rb}}
```

- Show the version of Ruby you are using:

```
ruby -v
```
