

# service

Manage services by running init scripts.  
The full script path should be omitted (/etc/init.d/ is assumed).

- Start/Stop/Restart/Reload service (start/stop should always be available):

```
service {{init_script}} {{start|stop|restart|reload}}
```

- Do a full restart (runs script twice with start and stop):

```
service {{init_script}} --full-restart
```

- Show the current status of a service:

```
service {{init_script}} status
```

- List the status of all services:

```
service --status-all
```
