

# csvstat

Print descriptive statistics for all columns in a CSV file.  
Included in csvkit.

- Show all stats for all columns:

```
csvstat {{data.csv}}
```

- Show all stats for columns 2 and 4:

```
csvstat -c {{2,4}} {{data.csv}}
```

- Show sums for all columns:

```
csvstat --sum {{data.csv}}
```

- Show the max value length for column 3:

```
csvstat -c {{3}} --len {{data.csv}}
```

- Show the number of unique values in the "name" column:

```
csvstat -c {{name}} --unique {{data.csv}}
```
