

date

Set or display the system date.

- Display the current date using the default locale's format:

```
date +%c"
```

- Display the current date in UTC and ISO 8601 format:

```
date -u +%Y-%m-%dT%H:%M:%SZ"
```

- Display the current date as a Unix timestamp (seconds since the Unix epoch):

```
date +%s
```

- Display a specific date (represented as a Unix timestamp) using the default format:

```
date -d @1473305798
```
