

at

Executes commands at a specified time.

- Open an `at` prompt to create a new set of scheduled commands, press `Ctrl + D` to save and exit:

```
at {{hh:mm:ss}}
```

- Execute the commands and email the result using a local mailing program such as `sendmail`:

```
at {{hh:mm:ss}} -m
```

- Execute a script at the given time:

```
at {{hh:mm:ss}} -f {{path/to/file}}
```
