

# redis-cli

Opens a connection to a Redis server.

- Connect to the local server:

```
redis-cli
```

- Connect to a remote server on the default port (6379):

```
redis-cli -h {{host}}
```

- Connect to a remote server specifying a port number:

```
redis-cli -h {{host}} -p {{port}}
```

- Specify a password:

```
redis-cli -a {{password}}
```

- Execute Redis command:

```
redis-cli {{redis_command}}
```
