test

Evaluate condition.
If it is true, returns 0 exit status, otherwise returns 1.

- Test if given variable is equal to given string:

```
test $MY_VAR == '/bin/zsh'
```

- Test if given variable is empty:

```
test -z $GIT_BRANCH
```

- Test if file exists:

```
test -e {{filename}}
```

- Test if directory not exists:

```
test ! -d {{path/to/directory}}
```

- If-else statement:

```
test {{condition}} && echo "true" || echo "false"
```
