webpack

Bundle a web project's js files and other assets into a single output file.

- Create a single output file from an entry point file:

```
webpack {{app.js}} {{bundle.js}}
```

- Load css files too from the js file (this uses the css loader for .css files):

```
webpack {{app.js}} {{bundle.js}} --module-bind 'css=css'
```

- Pass a config file (with eg. the entry script and the output filename) and show compilation progress:

```
webpack --config {{webpack.config.js}} --progress
```

- Automatically recompile on changes to project files:

```
webpack --watch {{app.js}} {{bundle.js}}
```
