nvm

Node.js version manager.
Switch between NodeJS versions: system, node, 0.10, 0.12, 4.2 etc.

- Install a specific version of NodeJS:

```
nvm install {{node_version}}
```

- Use a specific version NodeJS in the current shell:

```
nvm use {{node_version}}
```

- Set the default NodeJS version:

```
nvm alias default {{node_version}}
```

- List all available NodeJS versions and print the default one:

```
nvm list
```

- Run a specific version NodeJS REPL:

```
nvm run {{node_version}} --version
```

- Run app in a specific version of NodeJS:

```
nvm exec {{node_version}} node {{app.js}}
```
