jobs

> BASH builtin for viewing information about processes spawned by the current shell.

- View jobs spawned by the current shell:

```
jobs
```

- List jobs and their process ids:

```
jobs -l
```

- Display information about jobs with changed status:

```
jobs -n
```

- Display process id of process group leader:

```
jobs -p
```

- Display running processes:

```
jobs -r
```

- Display stopped processes:

```
jobs -s
```
