nginx

Nginx web server.

- Start server with the default config file:

```
nginx
```

- Start server with a custom config file:

```
nginx -c {{config_file}}
```

- Start server with a prefix for all relative paths in the config file:

```
nginx -c {{config_file}} -p {{prefix/for/relative/paths}}
```

- Test the configuration without affecting the running server:

```
nginx -t
```

- Reload the configuration by sending a signal with no downtime:

```
nginx -s reload
```
