lsattr

List file attributes on a Linux file system.

- Display the attributes of the files in the current directory:

`lsattr`

- List the attributes of files in a particular path:

`lsattr {{path}}`

- List file attributes recursively in the current and subsequent directories:

`lsattr -R`

- Show attributes of all the files in the current directory, including hidden ones:

`lsattr -a`

- Display attributes of directories in the current directory:

`lsattr -d`
